SPONSORS:

pro|CHILE

- Exhibitor Profile**
- Water Supply and Water Companies
 - Meteorological Agents
 - Agents and Distributors
 - Supplies, Equipments, and Machinery Suppliers
 - Suppliers of Equipment for specific processes
 - Measurement Systems
 - Laboratories / Analysis Companies / Telemetry
 - Professional Associations
 - Technological Research Institutes and Centers
 - Water Plant Operators and Construction Companies
 - Engineering Studies / Consultants / Project Managers
 - Public Institutions

- Visitor Profile**
- Professionals in the fields of Hydraulics, Projects, Public Policy, Process Control and Management, Supply and Operations, Sustainability, and CSR, related to:
- Wastewater and Water Treatment
 - Ministries and Municipal Governments
 - Mining Projects
 - Water Distribution
 - Transport and Storage
 - Industry
 - Agriculture and Livestock
 - Automation and Process Control
 - Project Management and Engineering
 - Research Entities and Academia

Technological Solutions for Efficient Use and Water Treatment

- Exhibitor Profile**
- Industrial Solid / Liquid Waste Management
 - Equipment and technology for handling and treatment of Industrial Solid / Liquid Waste
 - Equipment and technology for handling and treatment of Landfills
 - Logistics, transport and destination services
 - Odor treatment equipment and systems
 - Certification
 - Engineering Studies / Consultants / Project Managers
 - Support and promotion institutions
 - Banks and financing companies
 - Academic and Research Entities
 - Education and training

- Visitor Profile**
- Municipal Governments
 - Landfill companies
 - Industrial Solid / Liquid Waste Management Companies
 - Productive companies in general (food, mining, services, retail, airports, chemical, etc.)
 - Public sector representatives
 - Armed Forces
 - Hospitals and Clinics

Technological Solutions for Domestic Solid Waste (DSW) Treatment

- Exhibitor Profile**
- Gas handling technologies and equipment
 - Atmospheric emissions monitoring systems
 - Analysis systems and techniques
 - Solutions and technologies to reduce environmental impact
 - Technology, machinery, equipment and supplies for clean production
 - Environmental management consultancy services
 - Environmental management certification, systems and models
 - Solid waste recycling projects
 - Solutions, equipments and services for waste minimization, recycling and valorization
 - Support and promotion institutions
 - Banks and financing companies
 - Academic and Research Entities
 - Education and training

- Visitor Profile**
- Mining
 - Agriculture
 - Forestry
 - Chemical industry
 - Wine industry
 - Construction
 - Fishing and aquaculture
 - Hotel and restaurant sector
 - Health
 - Retail
 - Refrigerated and frozen product industry
 - Municipal governments
 - Consultancy
 - Engineering
 - Financial institutions
 - Universities and institutes
 - Government officials and authorities

Solutions for Solid Waste Handling and Management
